## PROFESSIONAL SUMMARY

---

I am a dedicated **MERN Stack Developer** and third-year computer science student skilled in **MongoDB, Express.js, React.js, and Node.js**. I focus on building responsive, efficient, and user-friendly web applications. As a fresher, I'm eager to apply my technical skills to real-world projects and continue learning modern web development practices.

## Projects

---

### Movie Ticket Booking System:

- Developed a full-stack web application using MongoDB, Express.js, React.js, and Node.js.
- Enabled users to book movie tickets, select seats, reserve parking slots, and pre-order snacks.
- Integrated real-time seat availability and optimized data flow for smooth performance.
- Designed a responsive and user-friendly interface to enhance the overall booking experience.

### Student Attendance Management System:

- Built a full-stack web application using MongoDB, Express.js, React.js, and Node.js for managing student attendance.
- Implemented two main roles: Admin and Staff, with secure authentication and role-based access.
- Enabled Admin to add, update, and manage student details and attendance records.
- Allowed Staff to mark daily attendance, view student history, and track individual records.
- Added features to store records permanently for future reporting and analysis.
- Focused on data accuracy, smooth performance, and user-friendly interface design.
